Alesis iMultimix 16 USB Mixer

Published by Khriz February 7, 2008 in Mixer and USB. 0 Comments

Almost one year after the release of the **iMultimix 8**, Alesis updates its mixer-to-iPod product line with this new model, the **Alesis iMultimix 16 USB Mixer**, a mixer that also features an iPod dock and can be used for studio and home recording or for live events.

The features of the **Alesis iMultimix 16 USB Mixer** are 16 channels, 16-bit resolution and 44.1 and 48kHz sampling rate audio recording quality, 28-bit digital effects (reverb, chorus, delay, ... more than 100), 3-band EQ per channel, iPod jog wheel and record and playback levels, +48V phantom power, 4 high-gain mic/line preamps, 2 guitar mic/line inputs and aux send and returns.

This mixer works only in Windows and Mac OS and includes the Cubase LE 4 software. The **Alesis iMultimix 16 USB Mixer** is now available and its price is \$600.
